

NEW TIME

Origins:

Man is responsible for these births of handicapped people, because in the way that is believed to have been correct, but for centuries it has not been correct. The semen or better known as young people the milk, is not to create human beings, the semen is for sexual amusements of heterosexual logical intelligence. It is not as common as it is customary for people to be able to be born safely while ruling out one of the most common birth-deadly cancers. The semen that comes from a dream is the modern updated way for human beings to stop being born handicapped. This semen that comes from a sexual dream is acquired by men not having sexual intercourse for no more than two weeks, at most a month of waiting. Once this semen originating from a sexual dream is obtained, it must be injected into the woman's ovum when she is ovulating. Men and women who are not interested in children being born healthy safely because in these ways it is complicated and they prefer sexual pleasure, they will be risking that children be born disabled or not, as is the case at present, most normal, minority disabled. The ways that children are born by semen are ruled out the possibilities that they can be born safely because of the common ways with semen it is the origin of all impediment, including baby cancer. He is aware that no one can control how the origin of births, **heterosexual sex**, is practiced, but they can have the knowledge that semen is the origin of baby cancer and of all physical and mental impediments.

Physical evidence of births by semen:

Semen is only for sexual intimacy as we have mentioned before because the consequences of being parents through births by semen is to run the risk of having children impeded because they are births that are by semen.

Impediment of physical body:

LGBTT retarded sexual mentality:

Cancer at birth:

Normal births of risky semen:

Normal births of risky semen:

Normal births of risky:

Births that were by semen and are born normal were highly likely to be born impeded as well because there are two ways to be born by semen, impeded or normal. The semen that comes from a sexual dream is also a physical liquid that also contains sperm where births by means of semen from a dream are completely safe and only normal. Men believe that semen that comes from a dream or known as wet dreams is a fantasy or is a lie and it is totally false because it is the only way that babies are born in safe normal ways from a **semen from a dream**.
